

# GERMICIDAL MANUAL UV-C LAMP

[WWW.ELE-TEC.IT](http://WWW.ELE-TEC.IT)

## INFORMATIONS

- Power supply: 230 V 50 Hz
- Lamp power: 400 W
- Purification surface: 50 x 90 at 40 cm distance
- Timer for setting the purification duration with end of treatment acoustic warning
- Support cart (optional)

Germicidal ultraviolet radiation is a sterilization method that uses UV-C ultraviolet light between 200 and 280 nm which modifies the DNA or RNA of microorganisms and therefore prevents them from reproducing or being harmful.

The use of the UV-C device creates a deadly effect on pathogenic microorganisms, viruses and molds on the treated surfaces.

The light produced by the germicidal lamp must be carefully shielded against direct vision; for this reason, during the purification phase, the use of suitable personal protective equipment is compulsory.
